

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Original) A pack of medicinal tablets, the pack comprising a base all which defines a plurality of locations for the tablets, wherein at each such location there is a displaceable pocket which constitutes a recess for a tablet, a cover piece of a rupturable material and a tablet between the displaceable pocket and the cover piece, wherein the pack is of a sufficiently rigid construction as to be resistant to permanent deformation.
2. (Original) A pack according to claim 1 wherein the pockets are integral with the base wall.
3. (Original) A pack according to claim 2 wherein the pockets contain naked tablets.
4. (Original) A pack according to claim 2 wherein the tablets are provided in a blister pack the tablets of which are located in the pockets.
5. (Original) A pack according to claim 1 wherein the base wall has openings which correspond to the locations for the tablets and the recesses are

those of a blister pack located against the base wall, with its blisters protruding through the openings, and functioning as the displaceable pockets.

6. (Currently Amended) A pack according to ~~any preceding claim~~ claim 1 comprising 4 to 16 pockets.
7. (Currently Amended) A pack according to ~~any preceding claim~~ claim 1 wherein the base wall is formed from a polymer.
8. (Currently Amended) A packet according to ~~any preceding claim~~ claim 1 wherein the pockets are substantially domed shaped.
9. (Currently Amended) A pack according to ~~any preceding claim~~ claim 1 wherein the pockets are integral with the base wall and the junction between a pocket and the base wall is a hinge.
10. (Original) A pack according to claim 9 wherein the hinge is pre-stressed.
11. (Currently Amended) A pack according to claim 9 ~~or 10~~ wherein the pockets are stable both in a starting position in which they accommodate a tablet and in an inverted position in which they have expelled the tablet, through the cover piece.

12. (Original) A medicinal tablet pack comprising:

- a base wall resistant to permanent deformation;
- a plurality of pockets formed in the base wall'
- a tablet in each pocket; and
- a cover piece of a rupturable material over the pockets;

wherein the pocket is displaceable so as to expel a tablet from the pocket, through the cover piece.

13. (Original) A medicinal table pack comprising:

- a base portion, and
- a pocket comprising an open end, and an opposite closed end, the pocket retaining a medicinal tablet, the pocket being attached to the base portion at an intersection between the base portion and the pocket wall;

characterized in that the pocket wall comprises a hinge at or in the vicinity of the intersection between the pocket and the base portion.

14. (Currently Amended) A pack assembly comprising two packs, each according to ~~any preceding claim~~ claim 1, joined together so as to have a stowed configuration in which the tablets cannot be expelled and an opened configuration in which the tablets can be expelled.
